HOW TO MEASURE FOR HELMET FIT:

Wrap a measuring tape around your head just above your eyebrows. Be sure to pull the tape comfortably snug. Then find your measurements in the chart below and select the helmet size that corresponds to your measurements.

ADULT SIZE	MEASUREMENT IN CENTIMETERS	MEASUREMENT IN INCHES
3XS	49-50cm	19-1/4"–19-5/8"
2XS	51-52cm	20-1/8"–20-1/2"
XS	53-54cm	20-7/8"–21-1/4"
SM	55-56cm	21-5/8"–22"
MD	57-58cm	22-1/2"–22-7/8"
LG	59-60cm	23-1/4"–23-5/8"
XL	61-62cm	24"–24-3/8"
2XL	63-64cm	24-3/4"–25-1/4"
3XL	65-66cm	25-5/8"–26"

YOUTH SIZE	MEASUREMENT IN CENTIMETERS	MEASUREMENT IN INCHES
SM	49-50cm	19-1/4"–19-5/8"
MD	51-52cm	20-1/8"–20-1/2"
LG	53-54cm	20-7/8"–21-1/4"

Also see "Helmet Fitment Specifications" in this section for additional details.

NOLAN HELMETS®

NOLAN® N43 N-COM®

NOLAN® N43 N-COM®

- VPS® (Vision Protection System) - short dark shield mounted on the inside of the helmet and moving independently from the face shield. It provides real eye protection and is also available in amber, light blue and light smoke. It is easily operated by a large rubber coated slider on the left side of the helmet
- Quick-change shield is optically correct, UV400 and fitted in an exceptionally large eye port
- Ready for the N-Com® communication system
- Lightweight aerodynamic polycarbonate shell with built-in spoiler for improved stability (3.25 lbs)
- Fully removable and washable Clima-Comfort® liner is anti-bacterial, anti-fungal and wicking
- Super-efficient JSW® top vent with exhaust grid in the rear spoiler works in conjunction with the air channels along the crown. It is operated by a glove-friendly rubber slider
- Microlock® (adjustable quick-release) retention system
- Velour chin-strap padding
- Both **D.O.T.** and **ECE** certified
- Includes VPS® removal tool

NOLAN® N43 TRILOGY

- 6 in 1 design
- Crossover design with quick-change accessories allows for customized looks and functions for every ride. Comes with the clear shield, the integrated sun shield, the peak and the removable chinbar
- GE Lexan® chinbar is EPS lined. Mounted with strong stainless-steel latches, it passes the tests for full-face helmets of the European standard ECE-2205
- VPS® (Vision Protection System) - short dark shield mounted on the inside of the helmet and moving independently from the face shield. It provides real eye protection and is also available in amber, light blue and light smoke. It is easily operated by a large rubber coated slider on the left side of the helmet
- Quick-change shield is optically correct, UV400 and fitted in an exceptionally large eyeport. It accepts the Pinlock® antifog insert (included)
- The short black peak can be installed in seconds instead of the clear shield
- Ready for the N-Com® communication system
- Lightweight aerodynamic polycarbonate shell with built-in spoiler for improved stability (3.6 lbs with all accessories)
- Fully removable and washable Clima-Comfort® liner is anti-bacterial, anti-fungal and wicking
- Super-efficient JSW® top vent with exhaust grid in the rear spoiler; works in conjunction with the air channels along the crown. It is operated by a glove-friendly rubber slider
- Microlock® (adjustable quick-release) retention system
- Velour chin-strap padding
- Both **D.O.T.** and **ECE** certified

SHARK EVOLINE 2 ST NEW

All these features of the original Evoline helmet:

- 2-in-1 helmet converts from a full face to an open face and back again
- 2 shell sizes
- Maximum air flow using multiple channel ventilation
- Anti-scratch visor
- Quick release aerodynamic visor
- Anti-scratch integrated sun visor
- Fully removable and washable interior
- Double D ring chin strap
- Weight: 1400g (+/-50g)
- 5 year manufacturer's warranty
- Meets or exceeds **D.O.T.** and **ECE 22-05** standards

Matte Silver

Plus:

- Sharktooth compatible
- Longer sun visor
- Ratchet visor system instead of spring controlled
- Upgrade locking mechanism on chin bar
- Upgraded neck roll for lower wind noise
- Shell made from multi directional composite fibers

SHARK SHARKTOOTH

SHARK SHARKTOOTH NEW

Special features:
- Paired devices maximum of 8
- Multipoint 3 profiles maximum (1 handsfree + 1 A2DP + 1 intercom)
- Incoming alert from other device when connected
- Stereo music streaming
- Full Duplex
- Full DSP noise cancellation/echo cancellation
- Automatic volume adjustment depending on ambient noise and speed level
- Easy to find volume/multi-point functions
- Digital volume control
- Voice recognition dialing (if phone supports)
- VOX command: Receive or reject incoming calls by voice control
- Waterproof
- Aerodynamic and compact shape
- Easy to install, compatible with most common helmets available on the market

Bluetooth compliance:
- Bluetooth Version 2.1

Supported Bluetooth profiles:
- A2DP advance audio distribution profile
- SBC stereo streaming/AVRCP audio

Operating range:
- Up to 10 meters phone range for hands free/A2DP
- Up to 400 meters intercom

Frequency:
- 2.4 GHz

Talk time:
- Up to 10 hours mobile phone
- Up to 10 hours intercom
- Up to 10 hours streaming A2DP stereo music

Standby time:
- Up to 700 hours/1 month

Charging time:
- 4 hours

Battery type:
- 2.4 GHz

SHARK HELMETS

BIKER'S CHOICE

NEW PART NUMBERS ARE RED

SHARK RSI

A perfect combination of technology, ergonomics and safety, the RSI helmet has sharp and aggressive lines that yield exceptional aerodynamic performance. With its balanced, carefully-crafted design, and its intrinsic safety qualities, the RSI is the benchmark for its class.

- Shell made from multi-directional composite fibers and strengthened with Carbon/Aramid
- 2 shell sizes
- 5 multi-element, internal shock-absorbers with differentiated density
- Airflow directed by integrated ducts and "Venturi" deflectors
- Dual-treated (anti-scratch/anti-fog) "Total Vision" 2.2mm visor
- Shark's patented "Push One" visor quick release system
- Optimized demisting using visor frame diffuser
- Fully removable and washable interior in microfiber fabric
- Ergonomic cheek pads
- Anti-fog visor and chin cover
- Meets or exceeds **D.O.T.** and **ECE 22-05** standards

HOW TO PROPERLY FIT AN ARAI® HELMET

These pages are designed only as a condensed version of your Arai® Fit Video.
They should be used as a reference only after viewing the video.

THE CUSTOMER:

Unless this is your customer's very first motorcycle helmet, be prepared for them to "help" you fit them, like telling you they already know their size, etc. Politely tell them that, to you, it's not a "helmet", it's an "Energy Management System", a device whose main job is to manage the energy of an impact. In order to do its job effectively it must fit a certain way, and your job is to help determine that proper fit. This statement should change their minds and persuade them to let you do your job.

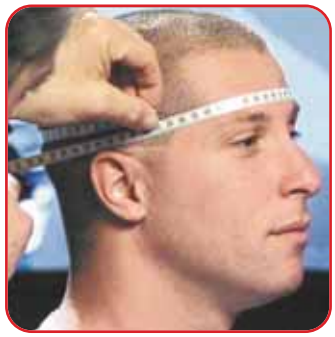
VISUAL EXAMINATION:

Begin with a visual examination of the customer's head shape.
Head shape is as important to a proper fit as head size. Is the head round or long?
Does the eyebrow area protrude from the forehead, or is it level with the forehead?
Does the forehead protrude, is it flat, or does it slope back from the brow?
Is the back of the head "pointed" or flat? Does the customer have a lot of hair, or little or none? Are the cheeks full, or even with the facial structure, or sunken?
(As the Arai® video explains, some customers – especially those who wear helmets that are too large – have full faces, and can make the mistake of wearing helmets that fit their face instead of their head.)

THE MEASUREMENT:

Measuring the customer's head is the starting point for the sizing procedure.
Due to varying shapes, heads that are apparently the same size when measured by a tape may not necessarily fit the same size helmet.
You are trying to find the longest distance around the customer's head, at eyebrow level, above the ears. It may require several different attempts to establish the longest possible measurement, but it is absolutely essential to getting the right fit.

NOTE: Be sure to use an accurate measuring device that shows inches (in) and centimeters (cm). They are obtainable at any fabric store or order **81-0128** for Arai's measuring tape.



TRYING ON THE HELMET:

1. First, have the customer grab the helmet by the chin straps, with the front of the helmet facing him and the top of the helmet facing down.
2. He should place the thumbs on the inside surface of the straps and balance the helmet with his index fingers.
3. Then, spreading the helmet apart by the straps, have him slip the helmet down over the head. This may take a bit of practice and extra instruction, so pay particular attention to this step.

If you see that the helmet slides down on his head with little or no resistance, you have your first indication that it may be too large. Obviously, if it will not slide down over the head at all it is too small. Many people unfamiliar with proper helmet fit are reluctant to pull down if they meet resistance as the helmet goes on. Only if the helmet is impossible to put on should you move up to the next size larger, since helmets that go on snug generally fit very well once they are all the way on. Remember, most people left to their own devices will select a helmet that is too large for them. The eyes should be approximately in the center of the eye port with the top edge of the liner padding just above the eyebrows.

CHECKING HORIZONTAL AND VERTICAL MOVEMENT:

While the customer is wearing the helmet, look carefully at the way it fits. Check to see if the cheek pads are in contact with the cheeks. Is there excess pressure on the cheeks? In most Arai® models the cheek pads/earcups can be removed to verify the fit around the crown of the head if necessary, and replaced with thicker or thinner units to fit the face better. If there is a problem in the fit around the facial areas, you should consider completely removing the cheek pads, and then fit alternate cheek pad thickness until the proper comfort level is achieved. You may choose, in the case of a customer with a particularly broad facial structure, to remove the cheek pad set completely to get their head into the interior of the helmet to prove that the circumference is correct. Then, address facial fit by adjusting the thickness of the cheek pads. (Obviously, as a retailer, having a selection of cheek pads in thicknesses to fit the varying models is going to be essential to this process.)

Look for gaps between the temples and the crown padding. Check the back of the helmet where the neck roll makes contact with the neck. Does it touch at all? Or is it pushing the helmet away at the rear, causing it to roll down over the eyes in front? After you have made your visual check, grab the helmet in your hands, one hand on either side, and try to rotate the helmet from side to side. Note any movement of the skin while doing this, as well as the amount of resistance to movement while the customer holds his head steady. The helmet padding should not slide easily over the skin, but should pull the skin in the direction of rotation. Next, check movement up and down, again noting skin movement and resistance. If there was little or no skin movement in either the vertical or horizontal tests, and/or the helmet moved very easily, the helmet is too large. A properly fitted helmet will cause the skin to move as the helmet moves, and the wearer will feel as if evenly-distributed pressure is being exerted around the head.

NOTE: Helmets are a little like boots, in that they will break-in a bit. For this reason, the best attitude to have when fitting is that the helmet should be as snug as possible, without being painful.

RETENTION CHECK:

WARNING: This test may be a little uncomfortable for the customer, but it is very important! Have the customer tightly fasten the chin strap so you can check it. After the strap has been tightly fastened, and while holding his head steady, have him reach over the top of the helmet and grab the back of the helmet's bottom edge with one or both hands. Then ask him to try to roll the helmet forward off his head. If it comes off, or comes close to coming off, it is too large or it is not the proper fit.

PRESSURE POINT CHECK:

Have him unfasten the chin strap and remove the helmet. Immediately after the helmet has been removed, observe coloration of the skin at the forehead and cheeks. A reddening of the skin in a small area may indicate a pressure point. Pressure points sometimes are not noticed by the wearer for several minutes, or even hours later. They sometimes cause headaches, and are at the least, uncomfortable. If you notice a pressure point, or the customer experienced discomfort there while wearing the helmet, it's too small or is the wrong interior shape. Before going to a larger size, have the customer try one or more of the other Arai® interior shapes in the same size to see if the pressure points are relieved.

THE ROLE OF HEAD SHAPE IN FITTING AN ARAI® HELMET

As said above, the shape of the head – the relationship between length and width – are as important as head size in properly fitting a helmet. Arai® now offers three interior fit shapes for full-face helmets, based on the following:

"Long Oval", The traditional Arai® fit — in which the head length is distinctly narrow side-to-side, combined with a longer front to back measurement. Arai's® Long Oval shell shape is currently available in the Profile.

"Round Oval", The transitional fit — in which the head is distinctly rounder, length and width being almost even. These shapes are typically very easy to see when you are looking at the consumer face-to-face, from eye to eye, as well as from the profile. Arai's® Round Oval shell shape is currently available in the Quantum series. (The RX-7 series has a "relaxed" Round Oval shell shape, which is not quite as pronounced as the Quantum's.)

"Intermediate Oval", The bridge fit — a round shape, but with considerably more forehead length in it. This shape "bridges" the gap between the two previous shapes. Arai's® Intermediate, Oval shell shape is currently available in the Vector series.

Arai's® Motocross and offroad helmets as well as our three-quarter open-face helmet lines do not share the multiple-fit packages. These are built on a single-fit package that runs in the middle of the shape range.

IN CLOSING:

Arai® is widely considered to be the world's best helmet. Let's make sure the customer gets the best service possible in the fitting of their helmet, to provide them with the satisfying, trusting Arai® experience.

ARAI® CORSAIR V

Black

- Hyper-Ridge around the bottom enhances shell strength while providing a larger bottom opening
- Larger bottom opening promotes ease of putting on and taking off the helmet
- Peripheral belting across the forehead area of the shell enhances structural integrity while maintaining flexibility, low weight and shell size
- Larger upper vent tabs make operating the vents easier even with thick winter gloves
- Arai "SAI" shield with Super AdSis shield system
- "SAI" shield is 5mm longer on each side and provides wider field of view
- "SAI" shield and base plates exclusive to Corsair V
- Latest generation of Dry Cool line has a new silver-grey color
- Rear mounting snaps are slightly re-positioned for exclusivity to the Corsair V
- Neckroll is removable and has additional exhaust channels to remove interior heat
- Cheek pads have the exclusive Emergency Release Tab feature
- Side exhaust cowls exhaust heat as well as add lateral stability at speed
- Enhanced air inlets of the new DF-9 difusser increase airflow efficiency
- Brow vents now duct air into the temple area and out the side vents for maximum cooling
- Exclusive AirWing provides unprecedented aerodynamic performance with 5 distinct positions
- Meets or exceeds **Snell** and **D.O.T.** standards

ARAI® RX-Q SOLIDS

ARAI® RX-Q NEW

- Completely new street helmet based on RX7
- Intermediate oval fit
- New wider eyeport, same as Corsair V
- Advanced ventilation
- Smaller, more aerodynamic shell shape
- Hyper-ridge circles lower shell to improve strength and aerodynamics
- Retractable chin spoiler
- Has emergency cheek pad removal system along with removable neck roll
- 1-piece bottom edge trim
- Meets or exceeds **Snell** and **D.O.T.** standards

ARAI® PROFILE

White

- Long-oval fit
- Brow Vent Faceshield Ventilation System provides cooling air in upper face area without holes in critical forehead area of the shell or in the impact-absorbing liner material
- Optically-correct pre-formed faceshields - better vision, UV ray protection with less distortion
- De-Mist Lock faceshield tab pushes forward to open the shield slightly - help clear fogging
- Removable Breathguard - reduce fogging by deflecting breath away from faceshield
- CLC (Complex Laminate Construction) shell - fiberglass composite is stronger and lighter - allows use of softer, less-dense liner materials inside for increased rider comfort
- FFS (Free Flow System) - reduces wind turbulence while increasing the exhaust of hot air from the facial area
- Dual Intake / Dual Exhaust Ventilation - dual TDF-2 top intake vents and DDL-3 bridged exhaust vents designed to draw significant volume of air from helmet interior
- Multiple-Foam Interiors for comfort
- Rear Exhaust Channel and Vent adds a racy look while drawing hot air from helmet interior
- Fully removable liner and cheek pads
- Enhanced pull down chin spoiler, increases exhaust of hot breath to minimize shield fogging
- Meets or exceeds **Snell** and **D.O.T.** standards

CARDO SCALA RIDER® Q2™ PRO

Each headset features:

- Bike to bike intercom communication up to 2,300ft[1]
- A2DP compatibility with MP3 players to listen to wireless stereo music[2]
- Multi-Device Connectivity Options (wireless or wired using jack connection with cable provided):
  - A mobile phone for hands-free conversations
  - A GPS device for in-helmet voice instructions
  - An MP3 Player for Stereo music
  - Another Scala Rider Q2™ PRO, Q2™ or G4™ headset for bike to bike intercom communication[3]

  (a Scala Rider Q2™ PRO headset can be actively connected to one Bluetooth device and 2 Scala Rider Q2™ PRO headsets at one time)
- Enhanced audio quality with amplified speakers
- VOX Technology- receive, initiate and reject calls by voice control
- Embedded FM radio with seek and scan functions and 6 user defined stations
- Full duplex- allows simultaneous talking and listening between bikers
- Talk time up to 8 hours, standby time up to one week
- AGC Technology- headset automatically adjusts its own volume based on ambient noise
- Noise canceling microphone
- Fits virtually all helmets, easy 5 minute self-installation

Description	P/N	Retail
• MultiSet includes 2 pre-paired Bluetooth® headsets		
Q2™ MultiSet Pro	21-0126	$389.95
Q2™ Pro (Includes 1 headset)	21-0125	209.95

[1] Results may vary according to terrain

[2] Stereo music requires compatible Bluetooth® and A2DP enabled MP3/iPod® device

[3] Bike to bike intercom communications requires additional Scala Rider® headset. Reduced operational range when connected to a Scala Rider Q2™.

CARDO SCALA RIDER® G4™

- Bike-to-Bike intercom communications with up to 3 other headsets with a remarkable range of up to 1 mile (with flip up antenna for extended range)
- Link together for 4-way intercom conference calling between 2 couples riding on 2 motorcycles (full duplex)
- Multi device connects with options. Headset is compatible with the following types of devices:
  - A Bluetooth® enabled mobile phone (for hands-free communication)
  - A stereo Bluetooth® enabled MP3 player/iPod device, adapter or mobile phone (for wireless music)
  - A non-Bluetooth® enabled MP3 player (accepts MP3 cord)
  - A Bluetooth® enabled GPS unit (for in-helmet voice instructions) GPS must support headset connectivity
  - A Scala Rider® Q2™ headset (for hands-free communication up to 500m/1,640ft)
  - Scala Rider® Solo/FM/TeamSet™ Pro headset (for hands-free rider to passenger communication)
- VOX Activation: intercom calls, answer, voice dial, redial and call reject functions
- Includes an embedded FM radio with scan and seek features and 6 station channel memory
- Individual audio sources- each G4™ headset can conduct mobile phone calls or listen to the FM radio or MP3 audio independently
- Full Duplex- allows simultaneous talking and listening when using intercom connections
- Talk time up to 10 hours, standby time up to 10 days
- AGC Technology- headset automatically adjusts its own volume based on ambient noise and driving speed
- Noise canceling microphone
- Weather resistant design
- Fits virtually all 3/4 and full face helmets

NOTE: Results may vary according to terrain.

scala rider®

CARDO SCALA RIDER® TEAMSET PRO

The new Cardo Scala Rider® TeamSet™ Pro, will greatly enhance the riding experience for rider and passenger on a single bike by featuring 2 identical, pre-paired rider and passenger headsets that provide rider to passenger intercom communication. Each headset can function independently of each other. Both users can make and receive their own voice activated, hands-free cellphone calls and listen to their own MP3 player/iPod® or GPS units.

Driver Headset Features include:
- Speak on intercom to passenger (full duplex)
- Initiate and receive own mobile calls by voice command
- Listen to own Bluetooth® enabled MP3 player (wirelessly or using wired connection with cable provided)
- Listen to own Bluetooth® enabled GPS device

Passenger Headset Features include:
- Speak on intercom to driver (full duplex)
- Initiate and receive own mobile calls by voice command
- Listen to own Bluetooth® enabled MP3 player (wirelessly or using wired connection with cable provided)
- Listen to own Bluetooth® enabled GPS device

Additional Driver and Passenger Headset Features include:
- VOX Technology- receive, initiate and reject calls by voice command
- Enhanced audio from dual ultra-slim speakers (less than ¼ inch thickness)
- Talk time up to 10 hours, standby time up to 7 days
- Utilize intercom function without a mobile phone
- AGC Technology- headset automatically adjusts its own volume based on ambient noise
- Noise canceling microphone
- Fits virtually all helmets, easy 5 minute self-installation

Note: Stereo music requires compatible Bluetooth® enabled MP3/iPod® device.
GPS voice instructions requires compatible Bluetooth® enabled GPS device

J&M®
ELITE 629 SERIES HELMET HEADSETS

NEW

- Only the finest quality components are used in the manufacture of these headsets
- Superior ambient noise canceling, wind blocking ability and natural human voice response of the latest version of J&M's high-output AeroMike® V
- Superior audio fidelity has been achieved with large diameter DynaPort®, non-ported and ultra-slim helmet speakers. (Proper acoustical installation is required, exact type will vary depending upon application)
- Versatility of J&M's durable Z-series 2-piece cord system allows these headsets to be connected to any factory installed motorcycle audio system ever built, now and in the foreseeable future, just by interchanging the lower-section hook-up cord

J&M® JMCB-2003B CB/STEREO/INTERCOM AUDIO SYSTEM

- Features a 40 channel CB radio, NOAA weather band, rider/passenger intercom
- Stereo music amplification from any Walkman®-type music device
- Mount it to your left handlebar with the proper bracket kit
- The complete system is on your handlebar
- The unit is water resistant so you won't have to worry about getting caught out in the rain
- Audio performance is superb, even at high speeds and that is most impressive considering it's compact size

Note: The JMCB-2003 is a J&M® 6-pin audio system that requires the pre-amplified microphone signal provided by Dual Mode (ECD/ICD/BCD/CD prefixed) helmet headsets along with the #HC-ZJM or #HC-PJM lower-section hook-up cord

WARNING: Due to variability of the network signal, there may be some interference in the wire connections that are not caused by the N-Com system of the wire used. Functions of the Bluetooth® communication system depend on the model of the mobile phone used. Not all Bluetooth® phones enable simultaneously the intercom function with another Bluetooth® helmet and the connection of the mobile phone. The functionality of the intercom kit system with the mobile phone depends on the type of telephone used and the software version installed on it.

LEATHER FLYDANNA® BY ZANHEADGEAR®

Color	P/N	Retail
Black	50-0232	$13.98
Black with Skull Pins	50-0233	16.98
Vented Black	50-0249	13.98

100% COOLMAX® FLYDANNA®

The Coolmax® Flydanna® is a step into the next generation of performance fabrics. 100% Coolmax® fabric breathes, moving moisture away from skin. Elastic band helps keep the headwrap firmly on the head without pinching or binding.

- Fabric is machine washable, colorfast and UV-protective
- Lightweight terry cloth sweatband keeps sweat out of the eyes
- Elastic band will not snag in hair
- One size fits most
- Black

50-9242 $11.98

FLYDANNA® DELUXE HEADWRAPS BY ZANHEADGEAR®

- 100% heavyweight cotton twill with terry cloth sweatband
- Longer ties for a wider range of adjustability
- Larger than standard Flydannas®, to accommodate a wider range of wearers
- Black

50-9115 $6.98

VENTED FLYDANNA® HEADWRAPS BY ZANHEADGEAR®

The Flydanna® Vented Sport is a lightweight, 100% vented polyester, similar to the fabric used in professional sports jerseys. The pigment-dyed fabric is fade resistant and extremely durable. These headwraps also have a cotton terry cloth sweatband.

BOBSTER® PHOTOCHROMIC

PHOTOCHROMIC

Photochromic sunglasses fuse technology with convenience and comfort. Designed specifically for constantly changing light environments, the polycarbonate lenses darken in the sun and lighten indoors in 1-2 minutes with a smooth transition that allows the eyes to adjust comfortably and naturally.
Note: These do not get as dark as normal sunglasses.

BOBSTER® GUNNER PHOTOCHROMIC CONVERTIBLE GOGGLE/SUNGLASSES

- Sleek and subtle convertible eyewear, which combines the most efficient aspects and functions of all eyewear available
- Wrap-around Grilamid TR90 frame can be worn either with smooth temples as sunglasses or with a detachable, adjustable strap as a goggle
- Vented removable closed cell foam prevents either lens fogging or wind and debris from distorting vision
- Photochromic lenses that change with altering light allow greater clarity, while rubber nose pieces create a lightweight, comfortable set of eyewear that allow you to truly enjoy the outdoor excursion of your choice
- The transmission rate for the photochromic lenses are 47% indoors and 15% in bright UV light
- For night riding, the Gunner comes with an additional set of clear lenses, making the Gunner one of the few pieces of eyewear for 24-hour use

50-9259 $79.98

BOBSTER® RUKUS PHOTOCHROMIC SUNGLASSES

- Combines function and style into 1 seemless pair of sunglasses
- Not only does it have removeable closed cell foam, but it also has anti-fog photochromic lenses
- In low light conditions these lenses allow 83% of the visible light through the lenses, while in bright light the lenses darken allowing 28% of visible light through the lens
- These features allow use in your everyday life or while you're participating in your favorite sport
- Includes a carry case and microfiber cleaning cloth

50-9301 $59.98

BOBSTER® INVADER PHOTOCHROMIC SUNGLASSES

- Open cell, fleece lined foam
- Grilamid TR90 frame
- 100% UVA and UVB, photochromic
- Polycarbonate lenses

- Ultimate in dynamic sunglass: it practically evolves before your eyes
- Photochromic lenses adapt to changing light conditions
- Removable foam insert and strap transform the frame from stylish street shade to functional riding goggle
- Flexible rubber and wire tipped temples create a custom fit, no 2 Cylinders are ever the same
- Removable Rx insert included
- Also comes with a carry case and microfiber cleaning cloth

50-9344 $59.98

BOBSTER® SPROCKET PHOTOCHROMIC CONVERTIBLE GOGGLE/SUNGLASSES

- Durable nylon frame features flexible rubber and wire tipped temples for a customized fit
- Anti-fog photochromic lenses for changing light conditions throughout the day
- Removable Rx insert included
- Converts easily to goggle with the removable foam insert and strap
- Also comes with a carry case and microfiber cleaning cloth

50-9345 $59.98

BOBSTER®

BOBSTER® PHOTOCHROMIC

BOBSTER® HOOLIGAN PHOTOCHROMIC SUNGLASSES

- Sleek and stylish eyewear with photochromic lenses, so they can go with you in all lighting conditions
- Frames around the face have a slight "cup" on the edges of the frame to minimize wind disruptions without the need for foam
- The lenses are photochromic starting with a light tint and transform to a medium gray in bright light
- The polycarbonate lenses are shatter resistant
- The Hooligan also comes with a microfiber pouch for easy transport

50-9271 $44.98

BOBSTER® FAT BOY PHOTOCHROMIC SUNGLASSES

- Photochromic lenses
- Polycarbonate lenses
- Grilamid frames
- Closed cell memory foam
- Anti-fog
- Microfiber pouch included

50-0395 $39.98

BOBSTER® RATTLER PHOTOCHROMIC SUNGLASSES

- Comes with anti-fog photochromic lenses and a wrap around, polycarbonate frame
- Lenses start at 85% VLT in low light conditions and change to 25% VLT or medium grey in bright sun
- Microfiber carry pouch is included for storage and cleaning

50-9307 $39.98

BOBSTER® HEKLER PHOTOCHROMIC SUNGLASSES

- Combines function and style into 1 seemless pair of sunglasses
- Not only does it have removeable neoprene foam, but it also has anti-fog photochromic lenses
- In low light conditions these lenses allow 83% of the visible light through the lenses, while in bright light the lenses darken allowing 28% of visible light through the lens
- Also comes with a carry case and microfiber cleaning cloth to keep these sunglasses in the best shape possible

50-9302 $59.98

BOBSTER® ROADMASTER PHOTOCHROMIC CONVERTIBLE GOGGLE/SUNGLASSES

- Photochromic lenses
- Grilamid frames
- Removable closed cell memory foam
- Detachable strap
- Includes carrying case and cleaning cloth

50-0393 $49.98

BOBSTER® RENEGADE PHOTOCHROMIC CONVERTIBLE

- Photochromic lenses that start out clear (V.L.T. 83%) and darken to a smoke (V.L.T. 28%) while in bright sun light
- Comes with removeable closed cell foam to ensure a tear free ride while cruising
- Carry case, microfiber cleaning cloth and goggle strap included

50-9305 $49.98

PACIFIC COAST PADDED SUNGLASSES

- Padded glasses offer protection from wind and dust much like a goggle
- Soft and durable foam lines the inner portion of the sunglass frames
- As an added feature, these padded frames float, making them excellent for use on watercraft as well
- Polarized lenses dramatically reduce reflective glare off of water, highways and other reflective surfaces, diminishing eye fatigue associated with prolonged exposure to the sun's bright glare
- **Sold as a 12-pack, retail priced individually**
